Patient Biometrics System (PBS) Processor User Guide

Changelog Version 2301.02

1. Fix the bug: *Data source rejected establishment of connection, message from server: "Too many connections"*.
2. Enhance fingerprints processing feedback.
3. Enhanced export performance.
4. Fix application freeze on a single thread.
5. Flexibility to configure database parameters.
6. Launch this documentation from the user interface by clicking 🔵 button.

How-To

Step 1: Edit the **app.properties** with the parameters to match your NigeriaMRS host server.
